

We are proud to present the world premiere of a revolutionary Dutch boating-invention:

**FLATFLOAT®.COM**  
FAST FOLDING DINGHY

Full-size 3 to 4 person tender, taking minimum space on board. Storage in parts even  
Set up without a pump or other tools in just minutes - like a tent or folding chair  
Same material as inflatables, but no air pressure, so much less sensitive to leaks  
Ready-to-row (paddles already in place) - fitting any outboard engine  
Quick-fold option: from 'flat' to 'float' or back in just 3 seconds!  
So the unusual looks of the **FLATFLOAT®** bring a lot of advantages!

## See it! Test it!

Check out our movies online: [www.flatfloat.com/movies](http://www.flatfloat.com/movies)

**FLATFLOATs** with multiple people, different engines, in a storm, setting-up, folding, etc.

Or come visit us at the Amsterdam boat show HISWA March 6-10 (Start-up Lane).

Else you can try a **FLATFLOAT**<sup>®</sup> in Brouwershaven (Zeeland), Netherlands.

We'd love to demonstrate one to you!

## Why?

We noticed the clumsiness of many existing dinghies around us; always in the way on deck, blocking the view, or taking lots of space below. When towed or on davits reducing a boat's speed, maneuverability, and elegance. Getting you wet when stepping in it or sitting on its sides, half overboard. And always leaking air after some time – with endless pump hassles.

Some folding dinghies do exist, but they all still have major drawbacks; too flimsy, too complex, too heavy, too small, too expensive, or in most cases: still too large folded.

An extensive development and testing process resulted in the creation of the patented **FLATFLOAT**<sup>®</sup> - which solves all these issues, for good.

With a solid, simple solution.

## For who?

Our main clients are:

- **Boat-owners** | Space is always an issue on board, no matter the size of a yacht. So obviously the **FLATFLOAT**<sup>®</sup> is an ideal tender, even as a second or crew dinghy.
- **Campers** | **FLATFLOATs** fit in any car trunk, caravan or camper. Its foldability and light weight make it ideal for camping holidays.
- **Charter companies** | No need to fit out charter boats with expensive and complex amenities for dinghies (davits, garages, etc). And no need to tow dinghies, resulting in more sailing comfort and less chance of lost or damaged tenders. Moreover if needed anyway, **FLATFLOATs** can be replaced in parts, making it a very attractive and much more durable solution for charter companies. Meanwhile users can deploy a dinghy in just seconds! Hence the ease of use, small storage and cost effectiveness appeal to both charter companies and their renters alike.
- **Dealers and Brokers** | Now dealers and brokers can more easily sell yacht models with only a small or no dinghy garage. For their clients the reduced need for space usually translates to enormous savings.
- **Government agencies** | Typically a separate trailer, launching slope or crane are needed to transport and deploy boats of the police, fire brigade, army or aid agencies. Not anymore! **FLATFLOATs** are handy in many situations, like flooding areas.

## FLATFLOAT<sup>®</sup>-Friends
